STEREO CASSETTE TAPE RECORDER

MUSICRUISER

SHC-47F. An omni-directional stereo center of exceptional beauty! Includes a special speaker system, a stereo cassette recorder and an AM/FM stereo radio.

The speakers face downward into a special deflector for wide dispersion of sound. Brilliant stereo wherever you sit.

Flawless stereo recordings with the quality cassette from remote control ON/OFF mike or directly from the sensitive AM/FM radio.

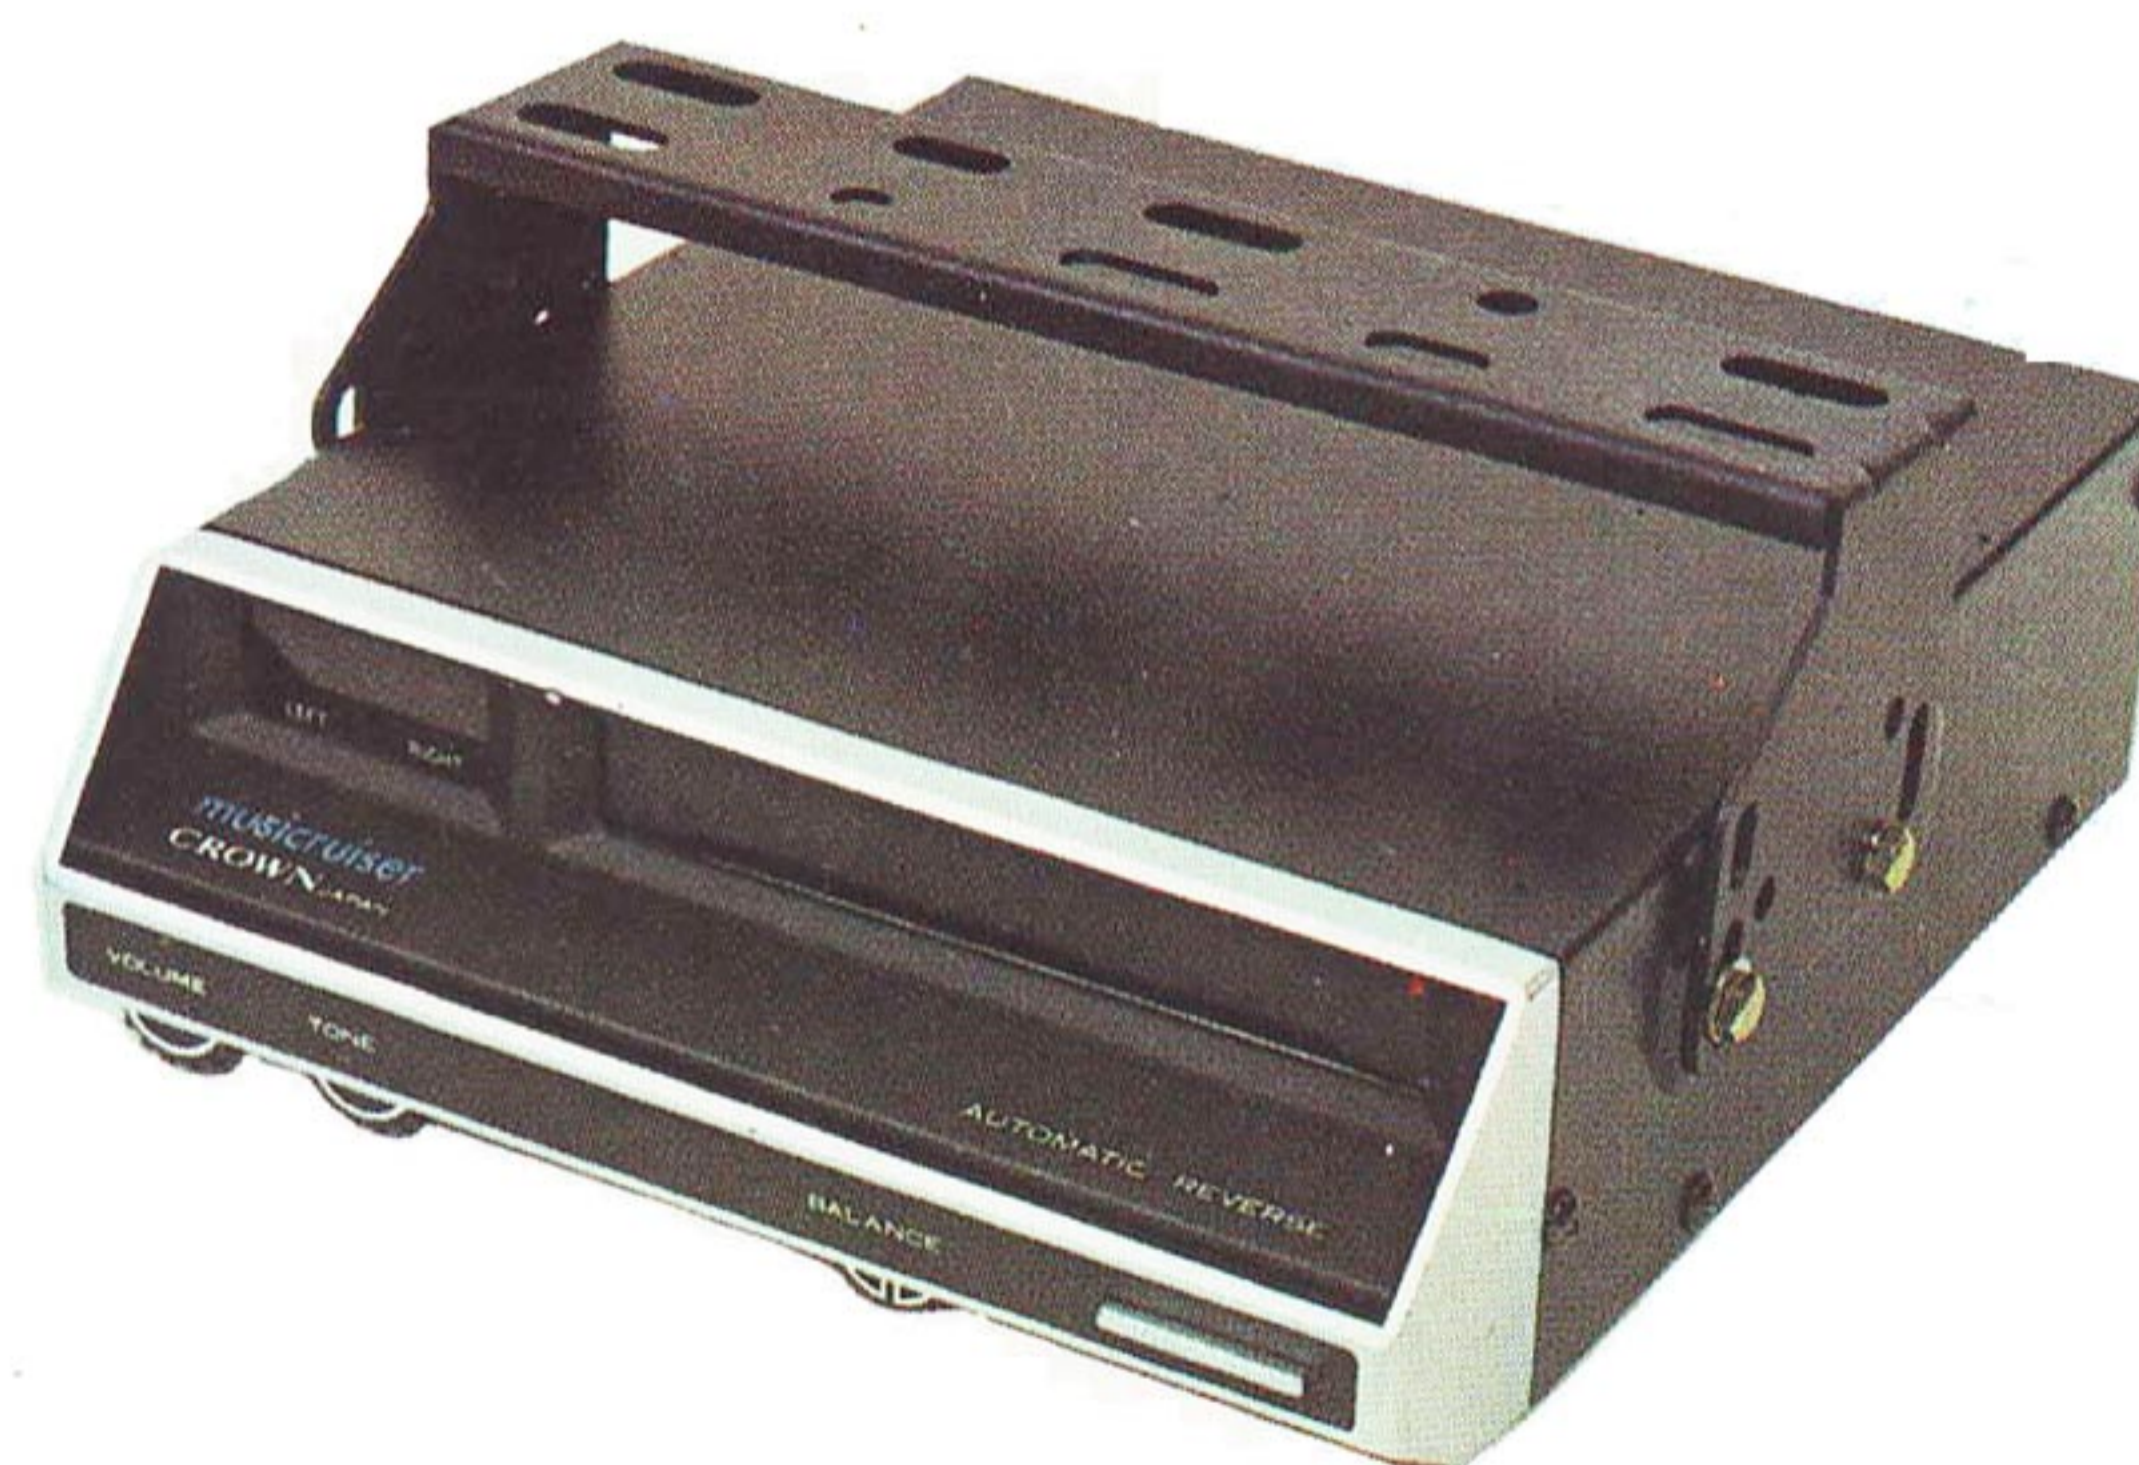

CSC-505FW. Here's the perfect portable stereo combination! You get a stereo cassette recorder and a sensitive AM/FM/FM stereo radio and two detachable stereo speakers and two quality mikes! All solid state with 24 transistors. (10-transistors radio) Piano-key push button stereo cassette controls for easy, accurate recording from remote control ON/OFF mikes or directly from the 2-band radio! Radio features new wide dial for quick tuning of AM, FM and Multiplex stations. Rich 15 watt output with 100-10,000 Hz response. Fold-away carrying handle. Truly portable, 11 lbs. Truly versatile, AC/battery operation.

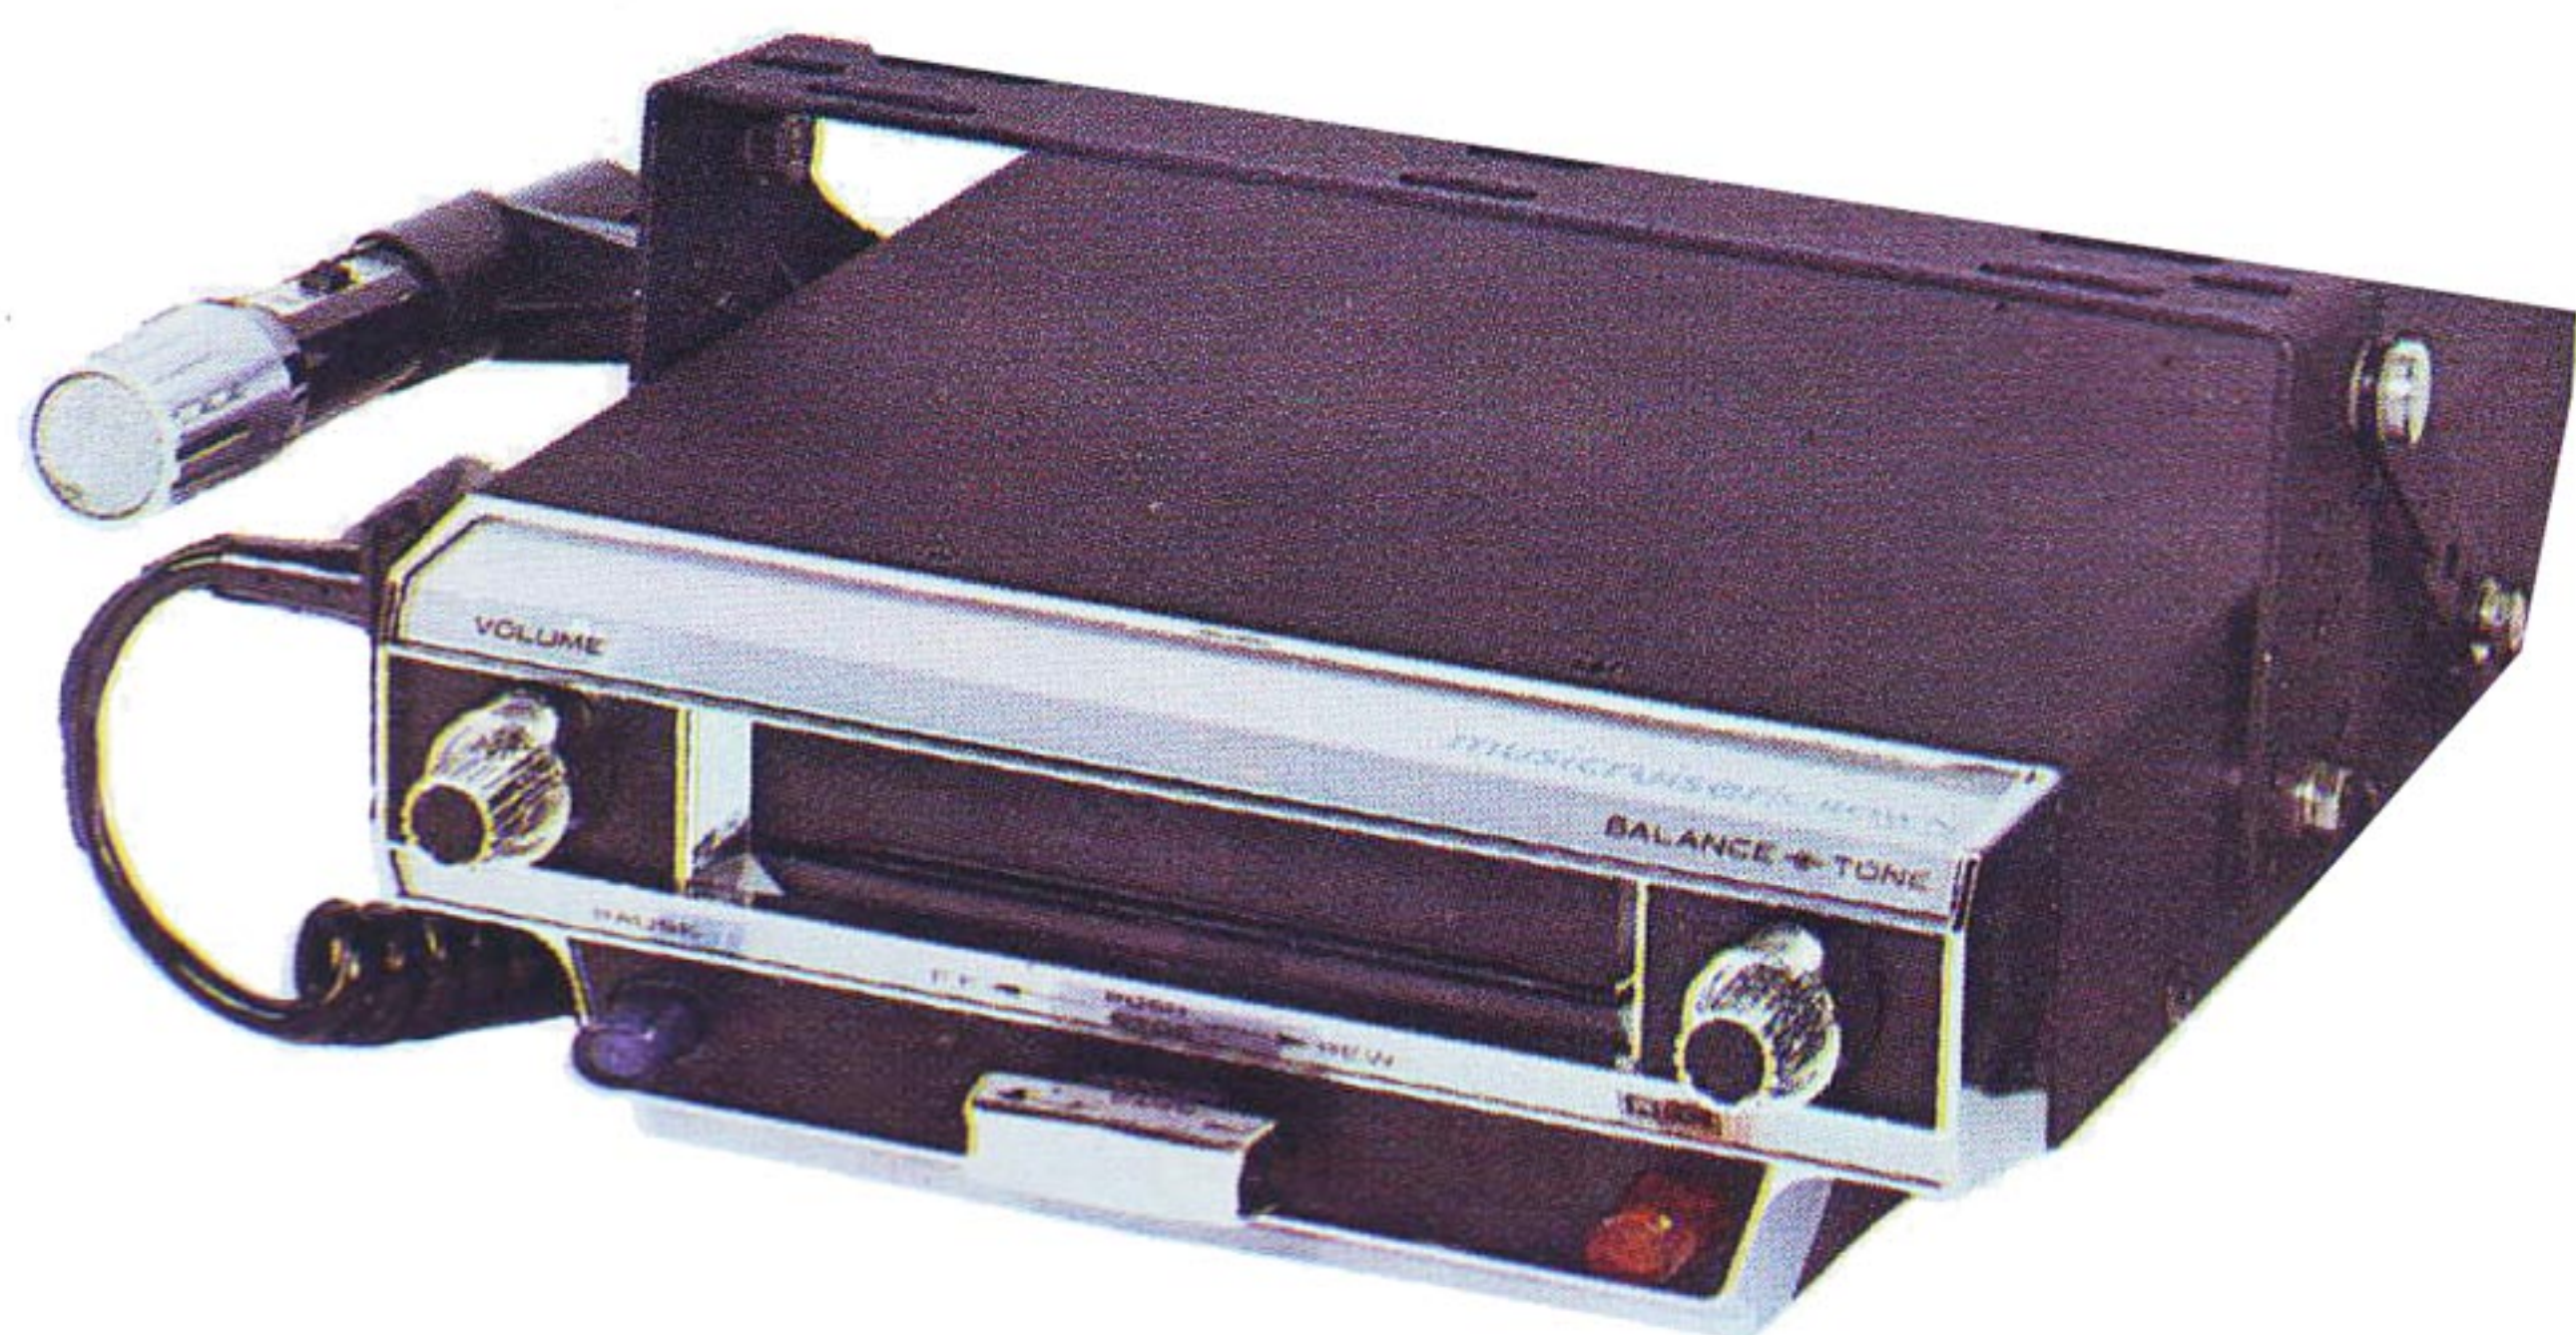

SHC-40F. For home builders who want good stereo without making a big investment the SHC-40F is ideal.

It combines a high quality cassette section with a 2-band radio on an attractive walnut base. Recording onto cassettes can be done directly from the radio in either AM mono or FM stereo, and from external sources. The radio's FM section has automatic multiplex circuitry. All cassette tape control is by single action piano-type keys and cassettes pop out of the chamber at the push of a button. Included is a tape counter, remote control mike, and left/right recording level meters. 35 watt outputs. Matching CSP-6 speakers optional. Size: 17-5/16" x 8-3/4" x 3-15/16".

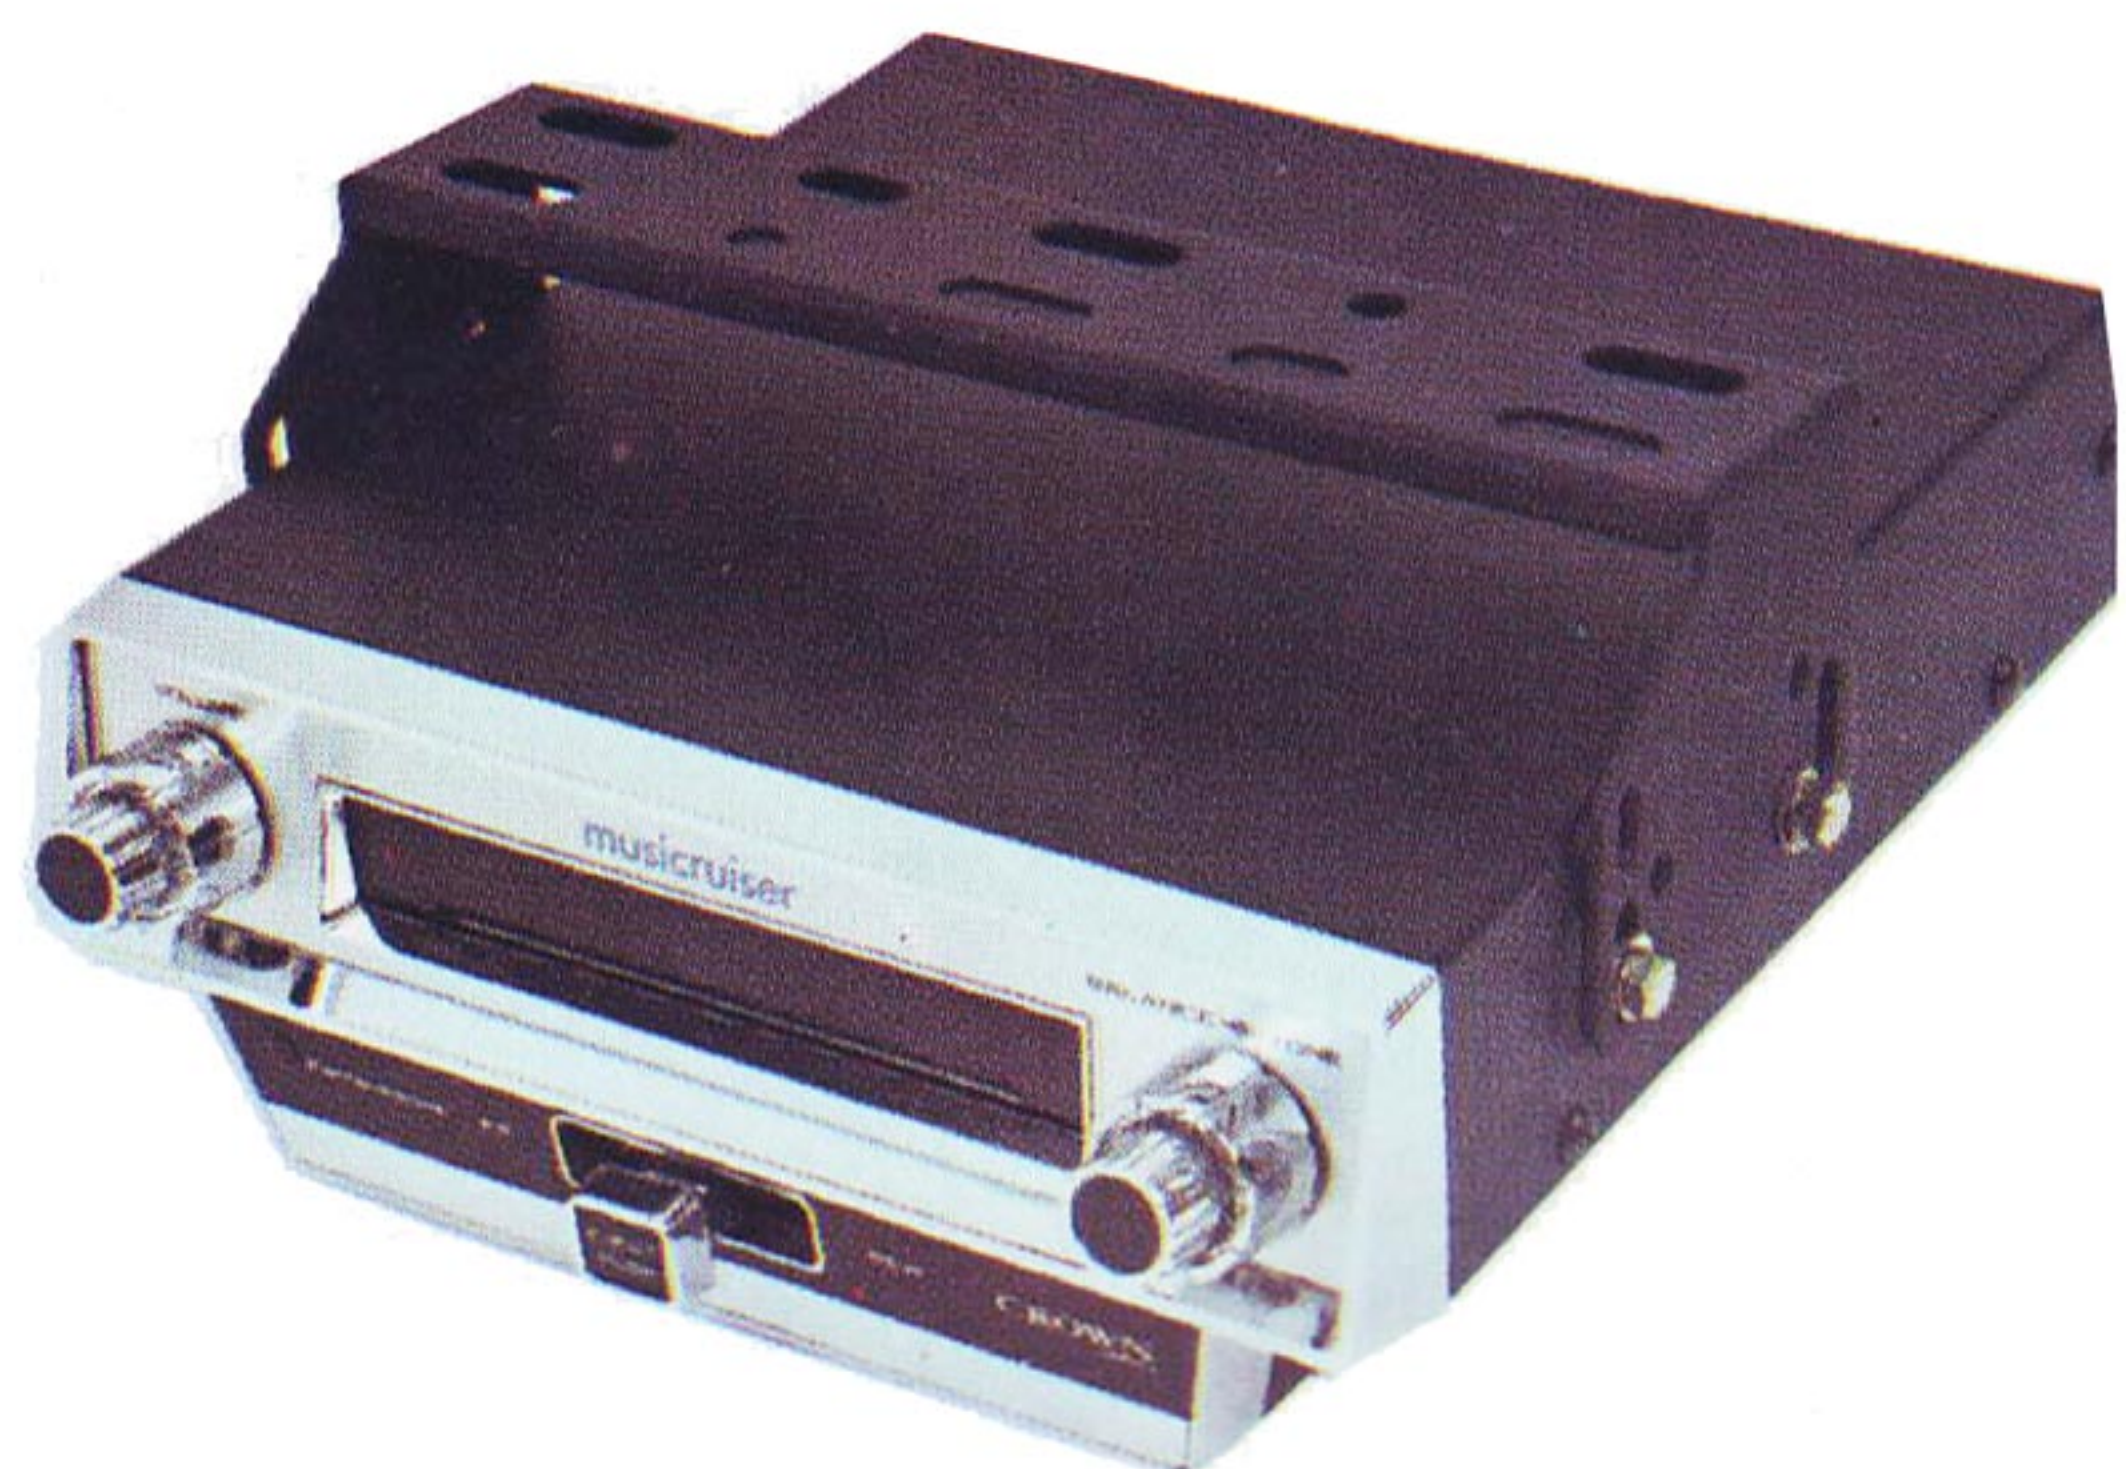

CSC-1800. Presenting the Musicruiser, a truly superior car stereo cassette system! Instant loading and eject with the proven "Staar" system. And unlike ordinary units, this CROWN technological marvel features automatic reverse. You do nothing. The Musicruiser automatically plays the reverse side. And then automatically ejects the cassette! A special motor assures constant tape speed for the most realistic stereo ever! Red lights signal tape direction. Sturdily built and attractively designed. Extra-large 15 watt output. High power and high fidelity are now yours in a car stereo system. Matching CSP-11 speakers are optional.

MUSICRUISER

CSC-1500. An exceptionally neat car cassette player/recorder with a special "Starr" loading mechanism. Because this mechanism automatically plays cassettes, ejects them and cuts off power, the motorist has far safer and easier control than usual. Plays stereo or mono vividly. Useful quality features include illuminated chamber opening, "Pause" button that stops and starts the tape without removing the cassette, and "Record" button that functions as a record level indication lamp. Slim, compact design. Easy mounting. Recording mike with remote control ON/OFF switch included. Full 15 watt output. CSP-11 speakers optional.

CSC-1300. Finally, a fuss-free foolproof car stereo cassette system! Here is quality car stereo with the automatic "Starr" loading just pop the cassette in! That's all! When the tape is over, the cassette pops up automatically. And the power is shut off, automatically. All instant-action operation with single lever control for fast forward and rewind. Balance and tone controls for the sound you prefer and for stereo effects wherever you sit. Specially designed for reliable performance even when driving over rough roads. Stunningly styled to give a deluxe touch to the finest car. Rich 15 watt output. Matching CSP-11 speakers are optional.

CROWNSCRIBER/AUTODIAL SYSTEM

CDM-10. The perfect piece of office equipment for the up-to-date secretary. Push in a cassette, press a button, and you get an hour-and-a-half of dictation. It is simple to operate for unmechanically-minded typists yet contains the latest in quality cassette technology.

A unique foot pedal sits under the desk and can stop and start the message at the tap of a toe. It even has CROWN's ingenious "Auto Repeat" function that takes you back through the last 7 seconds of the message.

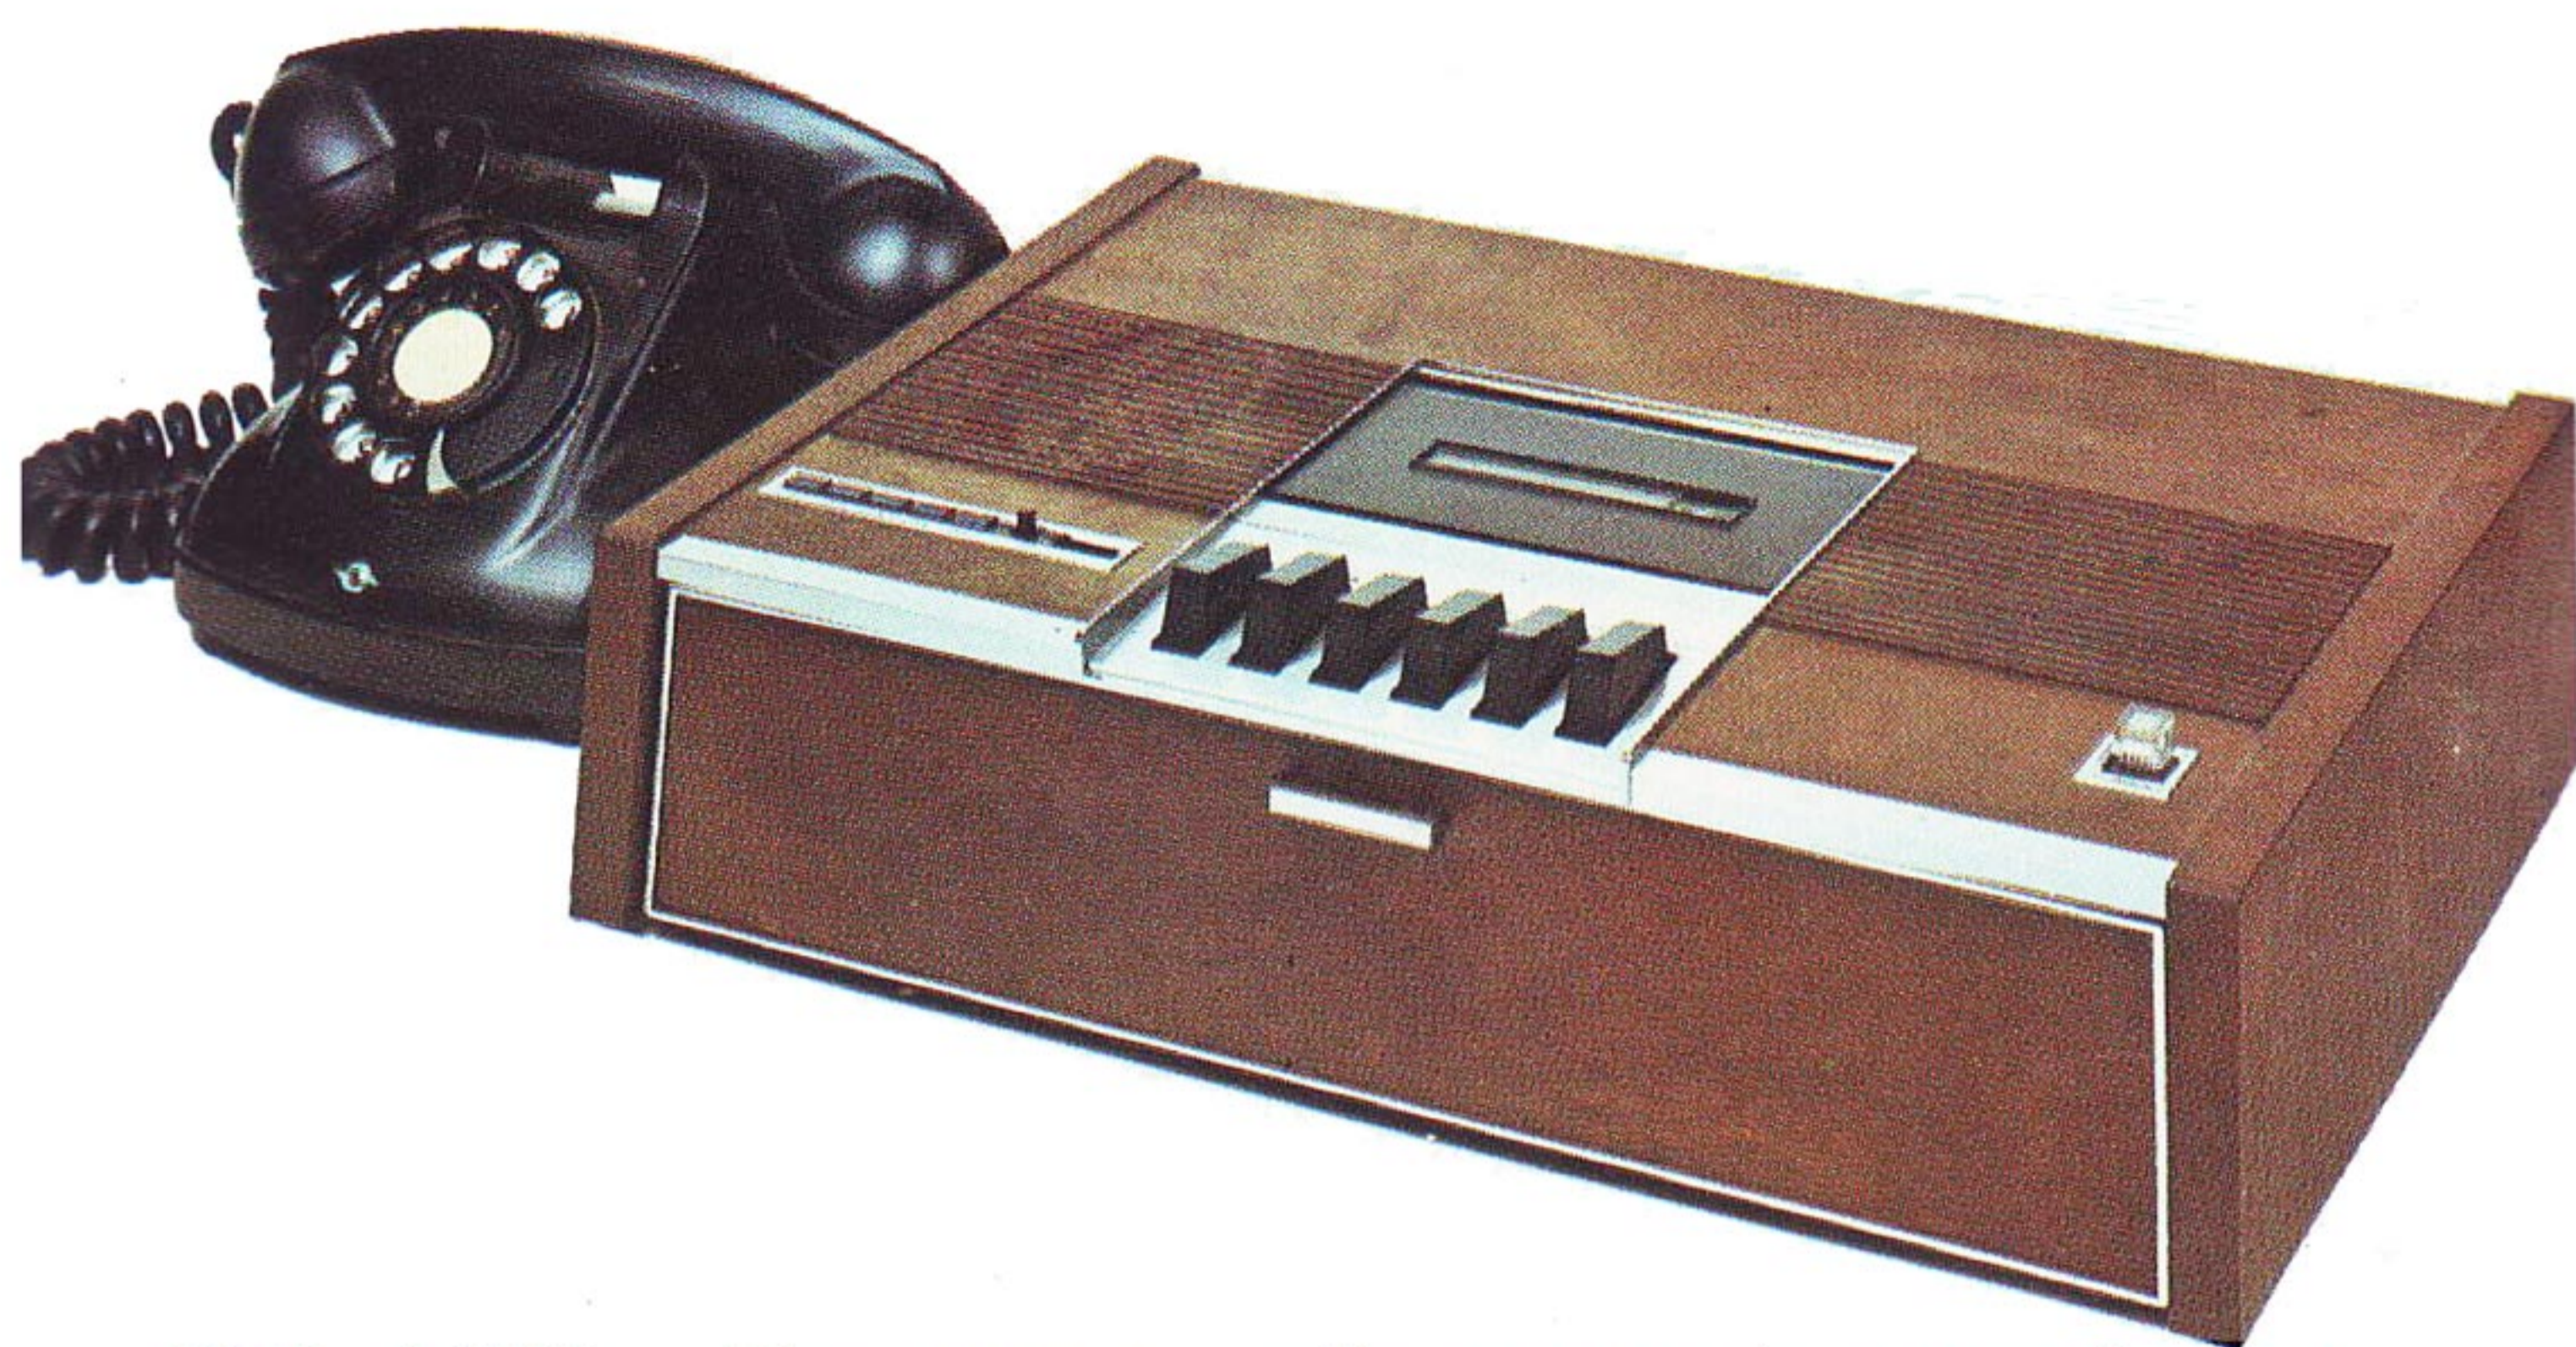

Cassettes slip in fast and pop-up at the push of a button. Works on batteries or AC. Complete with stethoscope type earphone, 3 digit tape counter.

CAD-8. A new automatic telephone dialing system with office amplification facilities. CROWN's AUTODIAL is an amazing time-saver for business and personal use. Just push a button and one of 26 pre-set numbers will be dialed automatically. You need not touch the phone until the call goes through. Then pick up the phone for a private conversation, or switch to "monitor" for vital business calls, family messages, etc.

Hang up, and all incoming calls are treated in the usual way. Pre-set numbers may be easily changed at any time. Installation is fast and fuss-free. Complete in attractive walnut patterned metal cabinet.

TELEPHONE VALET

CTA-4450. The most versatile automatic answering system of them all! Never miss another telephone call again! CROWN's Telephone Valet instantly answers every single call in your own voice. Caller can then record his message. An all solid state quality cassette recorder and CROWN's automatic level control assure clear recording at all times. And a full 1500 mW output assures easy listening. Special features include choice of recording time: 0, 30, 60 or 90 seconds. "0" for answering unit only. Beep tones tell the caller his message is being recorded. In handsome wood simulated plastic cabinet. Direct or indirect coupling.

CTA-4400U. The unique CTA-4400U works in combination with any home or office telephone, answers calls and records messages. It does it quickly and cleanly with handy snap-in cassettes and does it with realistic clarity because it has trouble-free advanced solid state units. You can prerecord a 23 second message through a built-in mike and receive messages of up to 46 seconds from each caller. All tape controls are by fast, simple keys and there are full audio controls so that you may check your own messages and adjust the volume and tone of anything on the tape. With oiled walnut cabinet. Power output of 1300mW. Optional RC-4 direct telephone line coupler available.

/COMPACT CASSETTE RECORDER

CTA-4100. The practical way never to miss another telephone call! Answers all calls with your own pre-recorded message. Perfect for those who already own a compact CROWN (or other) recorder. Incoming messages are accurately recorded directly for you to playback later. Easy to operate. Easy to install. A marvelous convenience for home and office. Compact in design. Sturdily built for year-in, year-out operation. Attractive appearance in a handsome wood-grained cabinet. Effective telephone cradle coupling system is used. Optional RC-4 direct telephone line coupler available.

CRC-7550F A brilliantly designed 3-band portable radio and cassette recorder with dozens of special features! Fool-proof cassette features instant-action push button controls for quick, easy operation. The sensitive radio offers AM, FM and Short Wave with a unique "automatic tuning indicator" to find the station's center for more listening enjoyment and optimum recording. Record directly from the radio or from mike with its remote control on/off. AC, flashlight batteries, or other 6V DC source. Chrome trim. High impact styrene cabinet.

COMPACT CASSETTE RECORDER

CRC-410FW. Here's an all-push button cassette recorder combined with AM/FM/SW reception. Integrally designed as one attractively styled and eminently portable unit. You get versatility with three different types of radio programs to choose from. Excellent sound, thanks to advanced all solid state electronics. Clear sound, thanks to an "automatic tuning indicator" which lights up when you dial the station's dead center. Record directly from the 3-band radio, or from the included mike with remote control on/off. Built for long-life with practical carrying handle.

CTR-350W A new slim style cassette recorder to carry around or install in the home. AC/DC operation. To control all tape actions there is a line of neat push buttons and for sound control are two special slide controls. To reload cassettes you simply push a button and the cassette chamber instantly opens. ALC (automatic level control) circuitry is built-in. This compact unit has a high output of 1000 mW and music is delivered loud and clear through a quality PM dynamic type speaker. Jacks for remote control mike, earphone, auxiliary for versatility. Weighs only 1.4 lbs. The ideal take-anywhere recorder/player!

CTR-320W. The first truly portable and automatic cassette recorder for instant action! Hang this all-new audio marvel from your shoulder and just slip a cassette in! Simply closing the chamber automatically starts playback! No other cassette unit has this special feature! And that's only the great beginning! Push one button and you're recording (no need to hold down two buttons simultaneously). Slide controls for easy F.F. & REW. one-hand operation. Special "STOP" switch that shuts everything off. Exceptionally slim, compact design. AC/DC.

CTR-9001. The go-anywhere cassette recorder that compacts quality engineering into a neat, new form. Built into the CTR-9001 is one of Crown's efficient cassette units, a 2-1/2" round PM dynamic speaker and a full set of piano-key type controls. And the whole thing weighs only 3.3 lbs. Takes 3 types of cassettes C-30, C-60 or C-90. Full tone and volume control, mike and earphone jacks. All the accessories included: handsome leatherette carrying case, earphone, four batteries, dynamic mike with stand, microphone case, patch cord, and a ready-to-use cassette.

CTR-8750. In tune with portable cassette popularity is this compact, functional set. All features necessary for excellent recording and playing are found in the CTR-8750. It has businesslike single-touch keys set into the body and full tone and volume controls. A tape-up button flips out the cassette for easy removal. There's also a useful record level indication lamp and a full set of jacks for versatile use. The included mike can be operated by its own remote control switch. Comes in a modern, slim cabinet with built-in handle and weighs just 4.4 lbs.

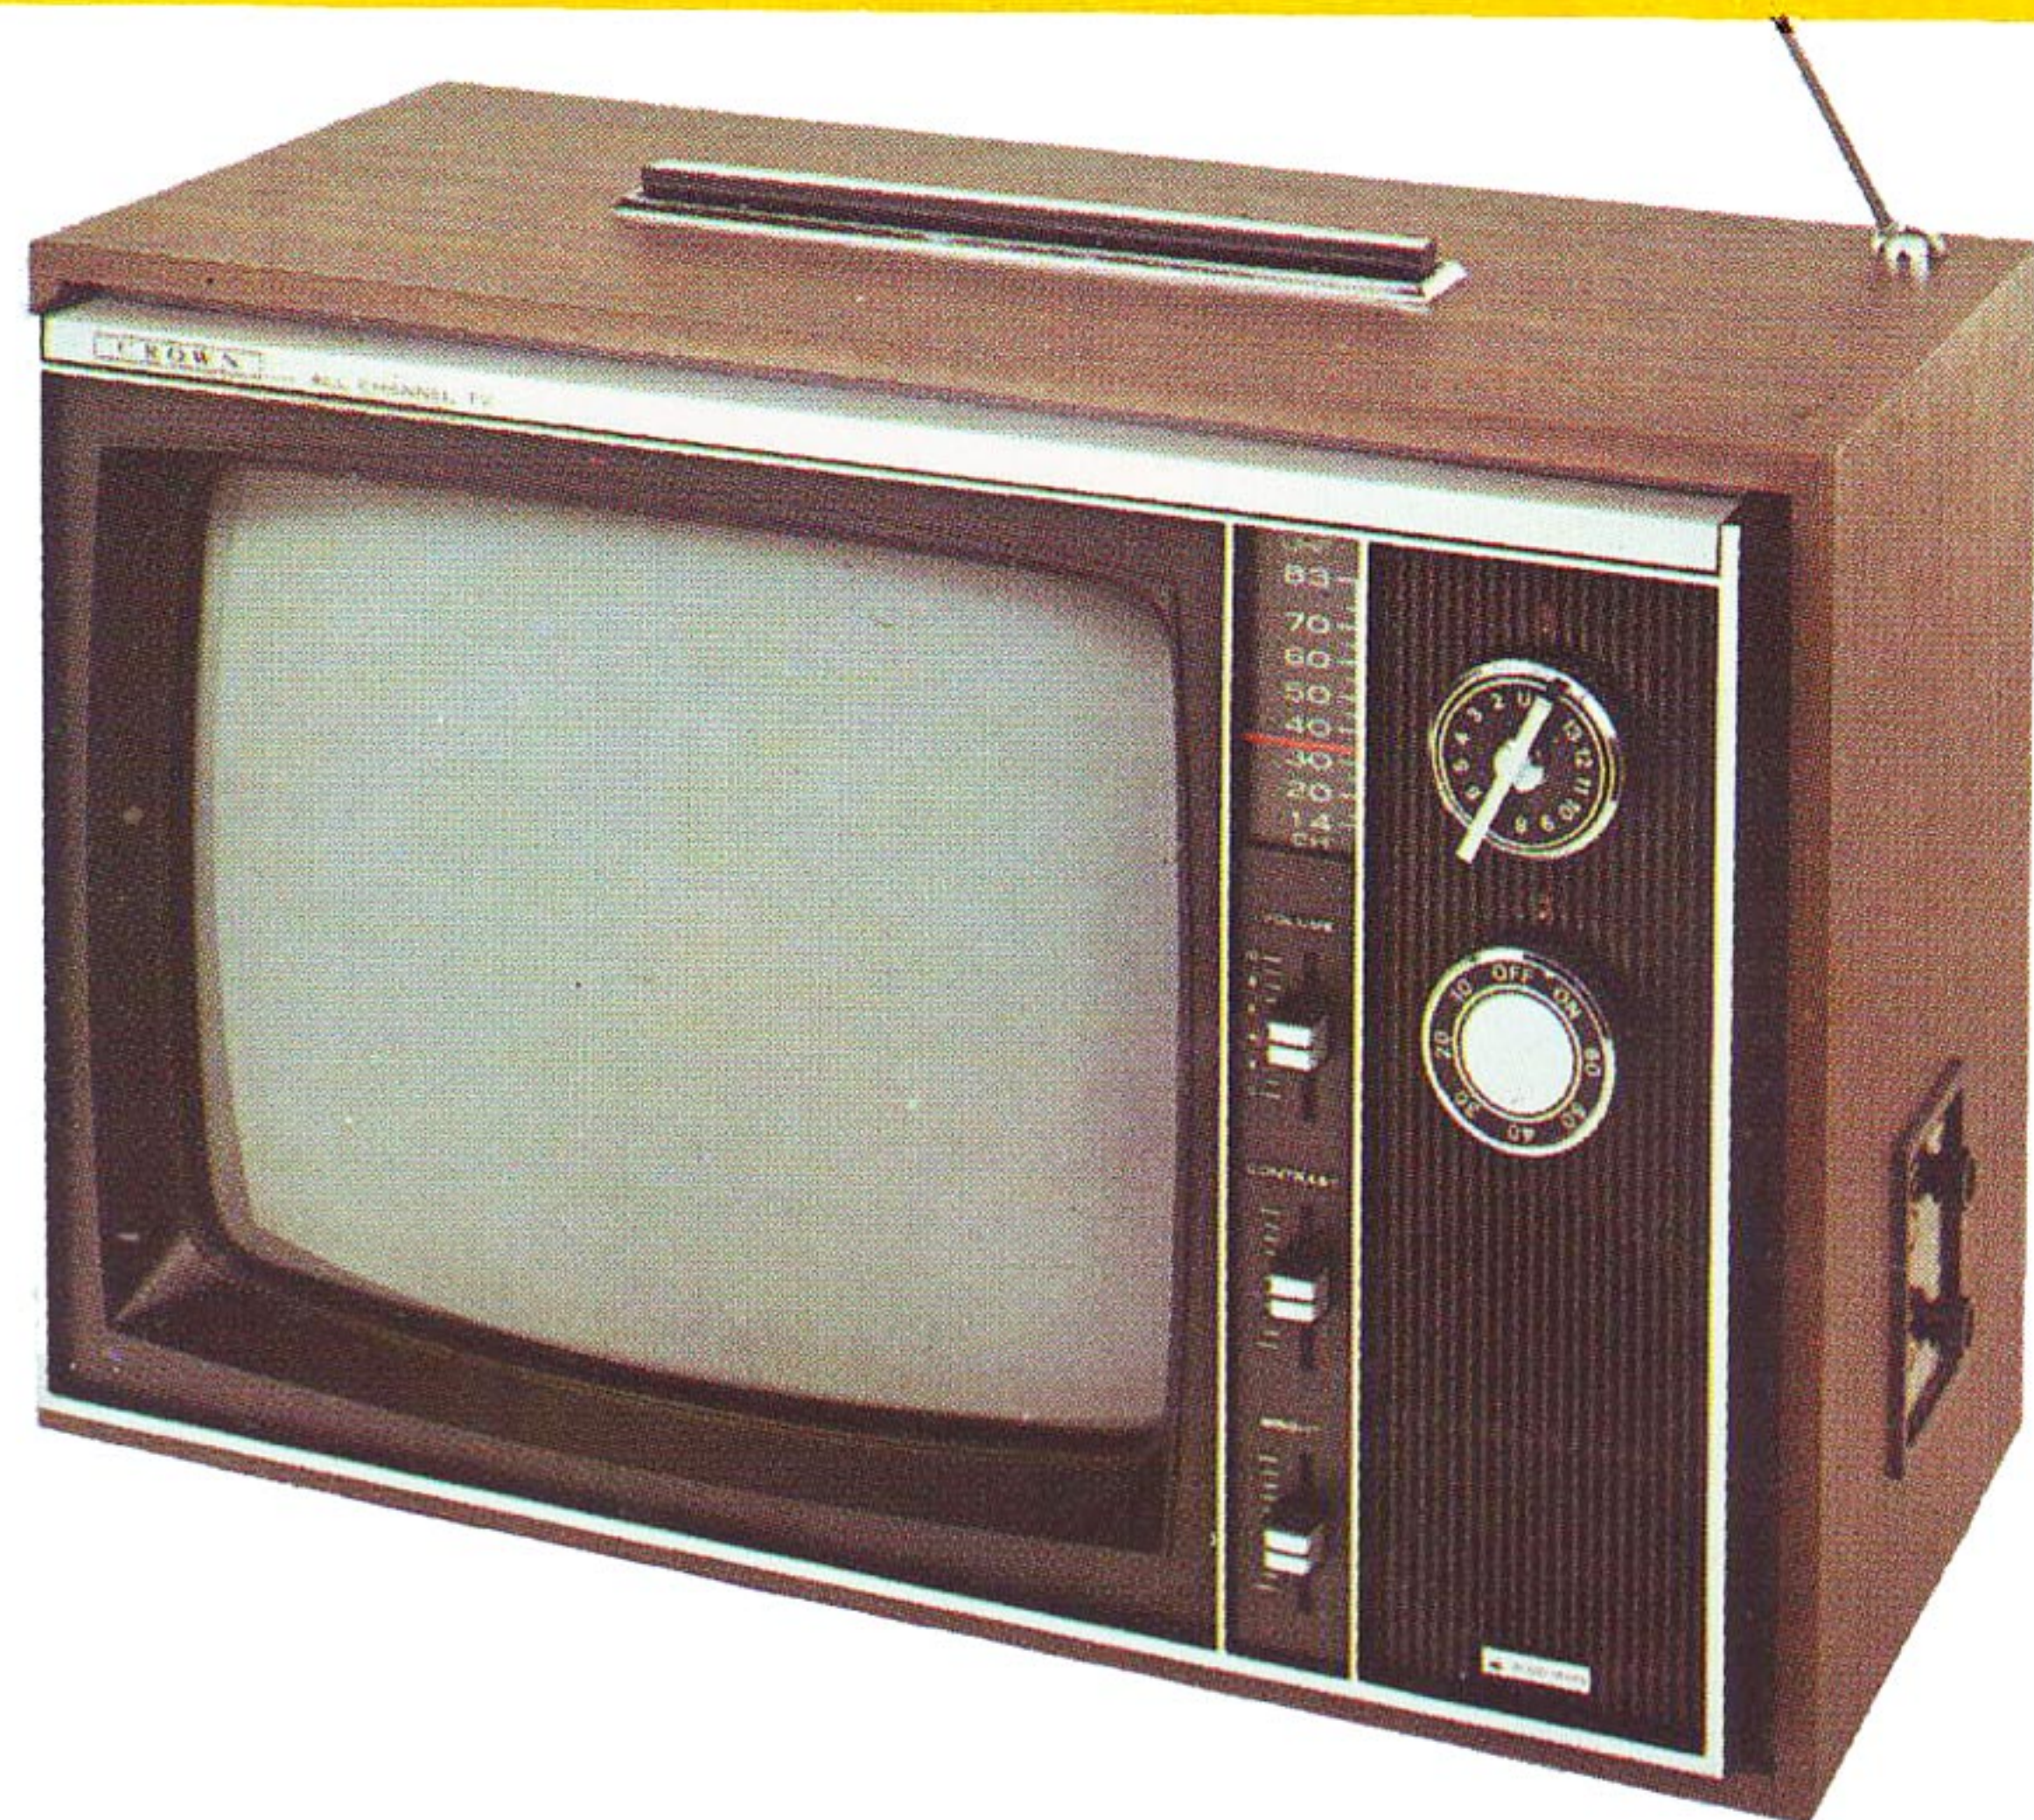

CTP-200. The most compact cassette player ever made! CROWN's engineers have finally perfected the ideal cassette player when space and convenience are at a premium! Only 2 lbs., this beautiful unit is only 8.5" x 5" x 2-1/2"! Compact? Yes! But with concentrated quality. So you get a full 800 mW output! And a built-in earphone jack for private listening anywhere and anytime at the volume you prefer. Plays 60 and 90 minute cassettes. Operates perfectly from flashlight batteries or from AC with optional adaptor.

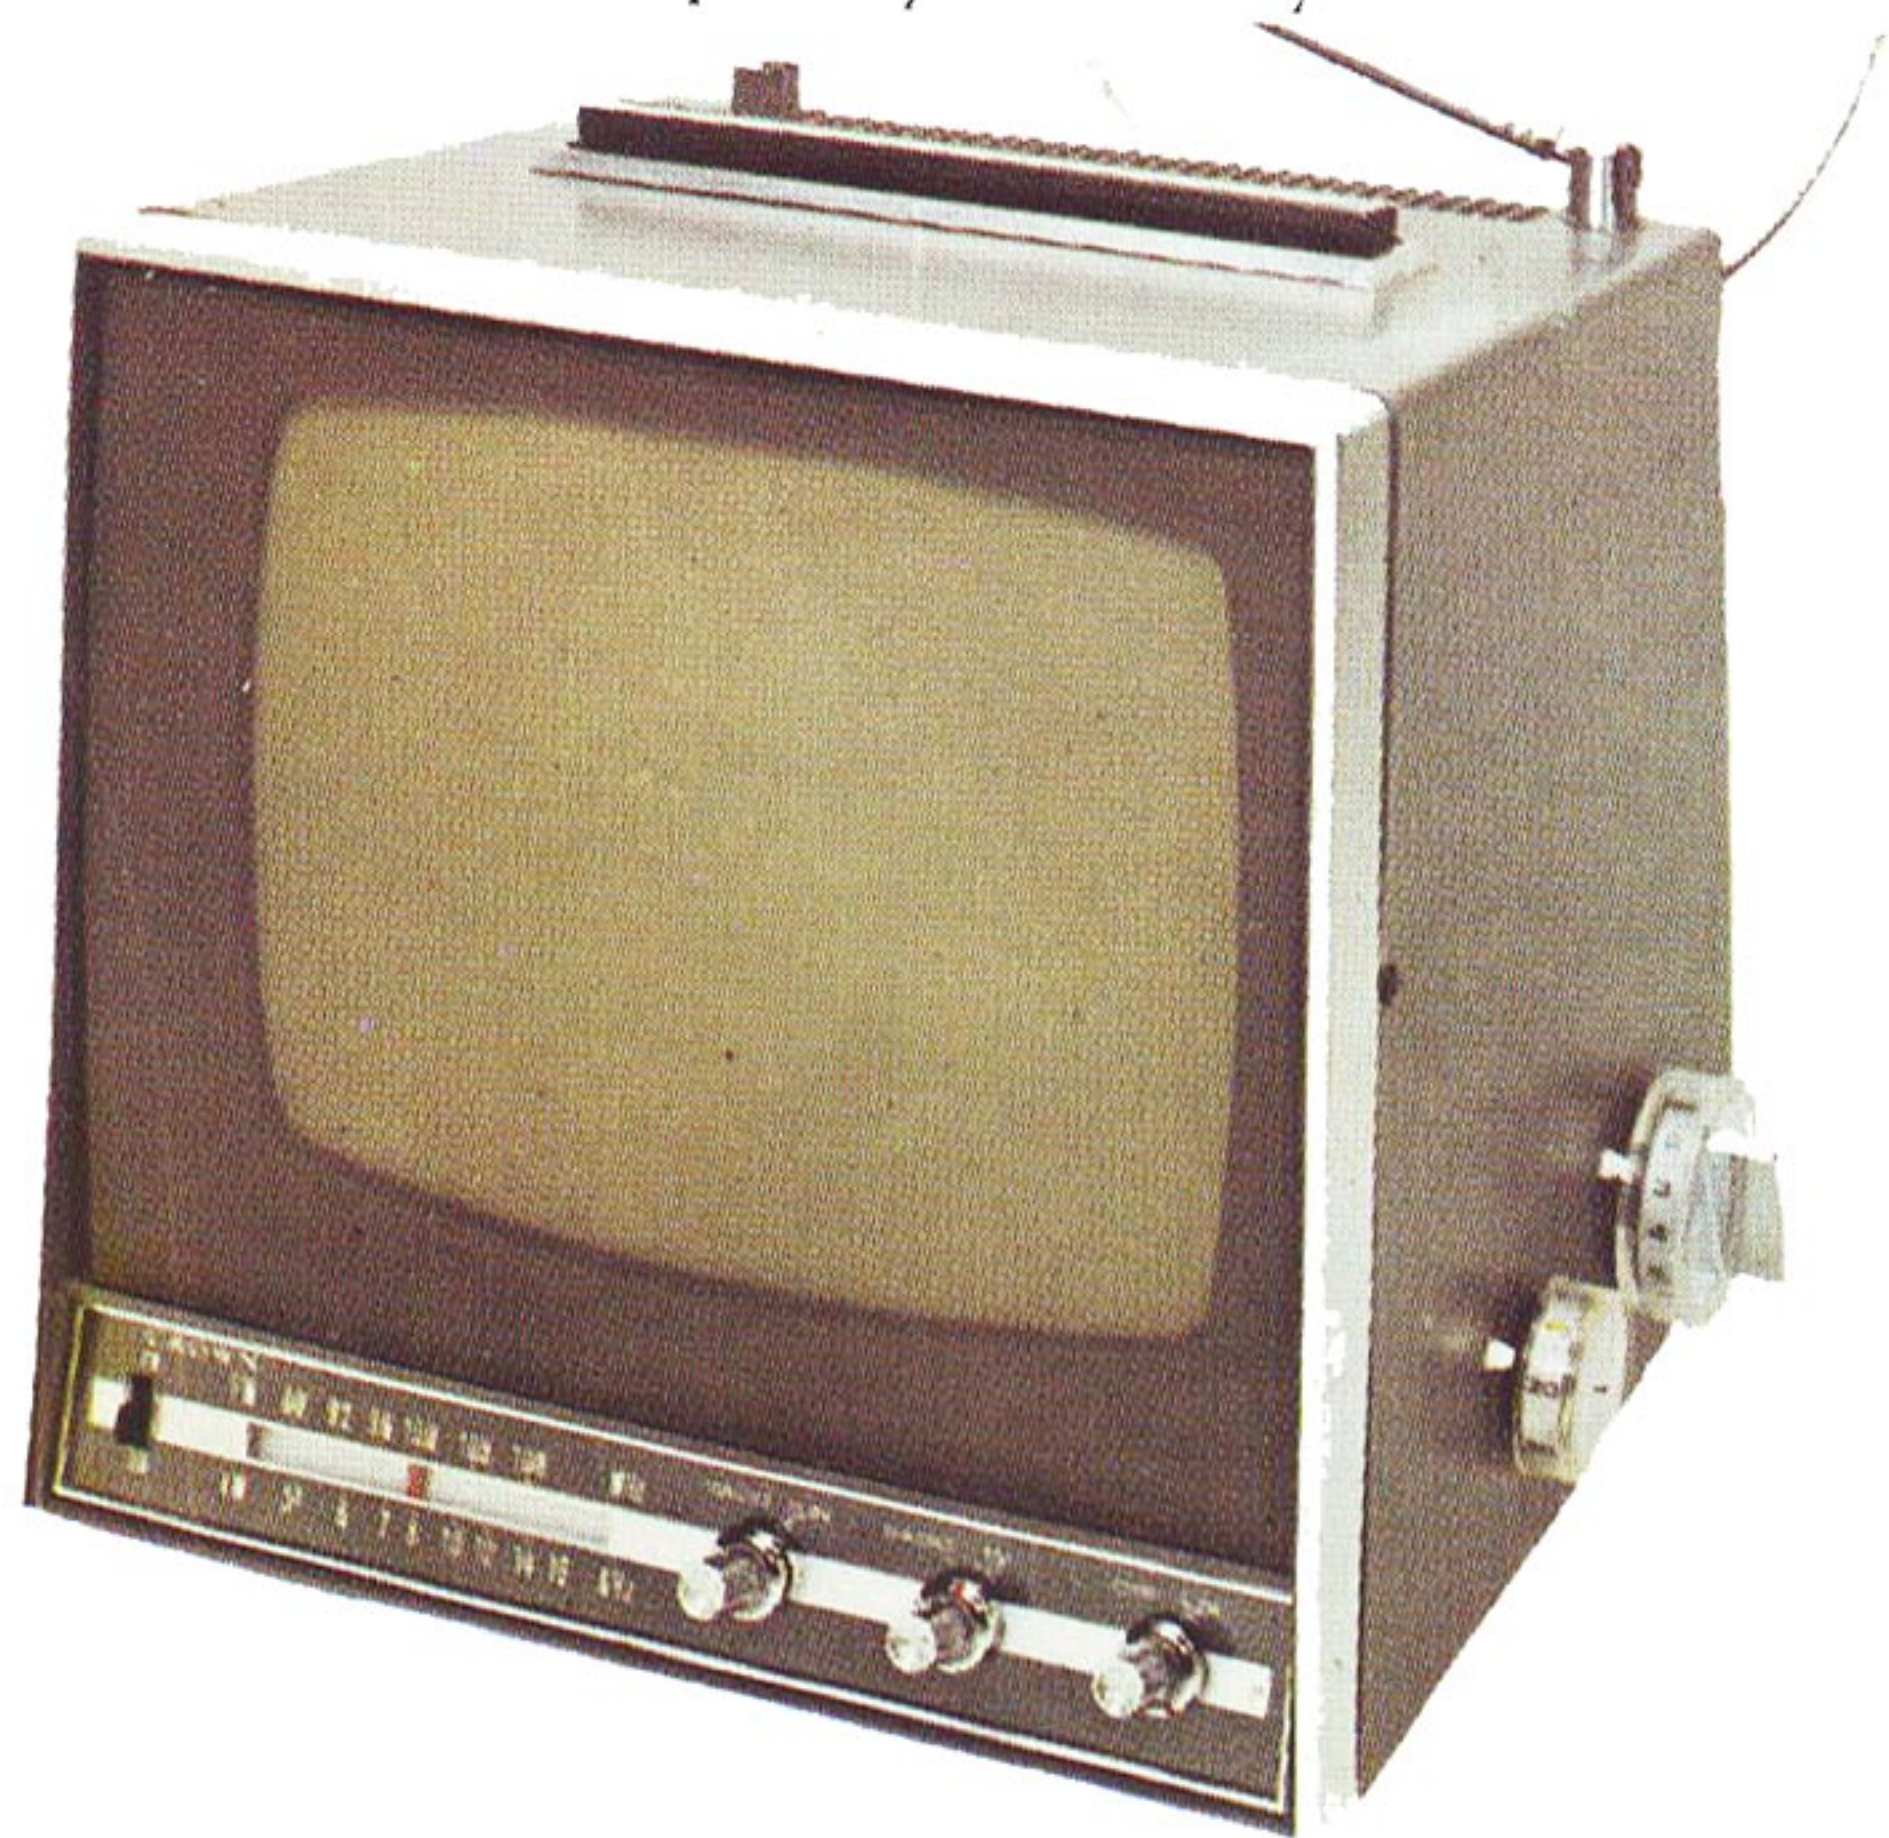

13CX-1. All-new beautiful color TV of a unique design. CROWN now presents an advanced solid state color television unit with a full 78 square inch screen (12" diagonally). You get all the latest conveniences like fully automatic color control (and automatic defeat). But you also get special features that ordinary units never have! For example, a power consumption that is the lowest of any comparable unit anywhere!!! This not only saves electric bills, but, more importantly, it assures longer-life and top performance with superior stability! Printed board solid state circuitry. Unlike ordinary "economy" plastic units, this precision-engineered set comes in beautiful walnut. Generates pride of ownership.

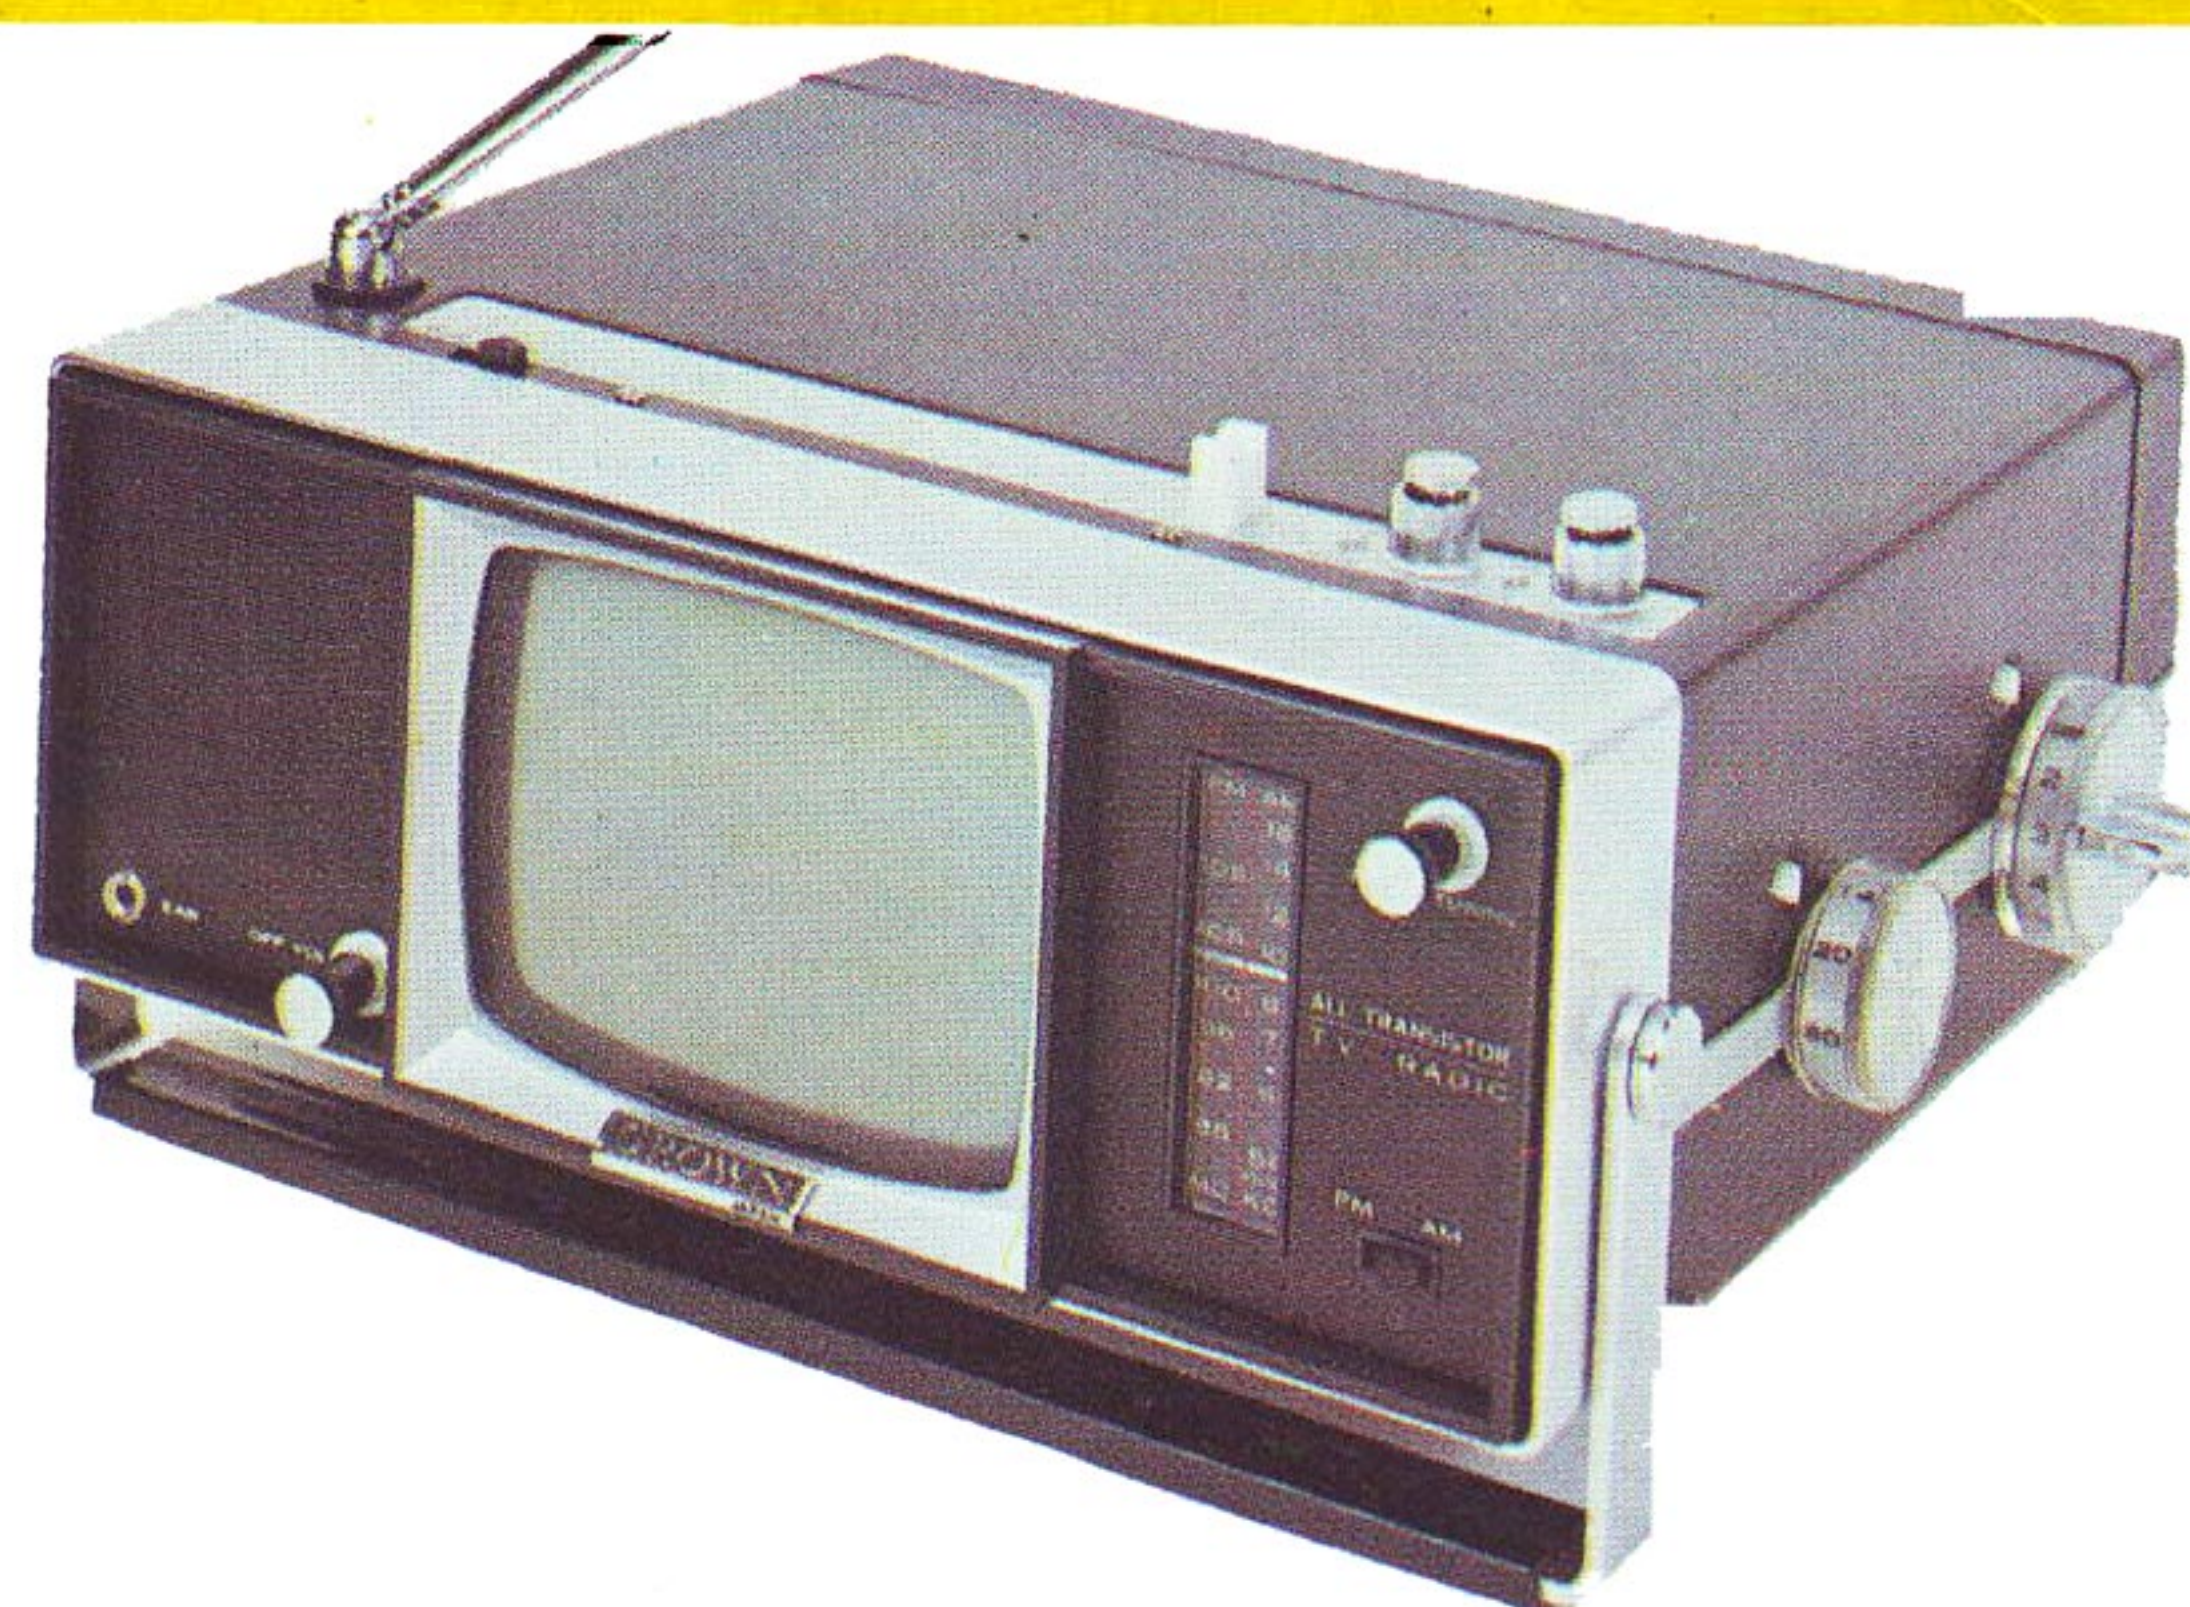

PORTABLE TELEVISION

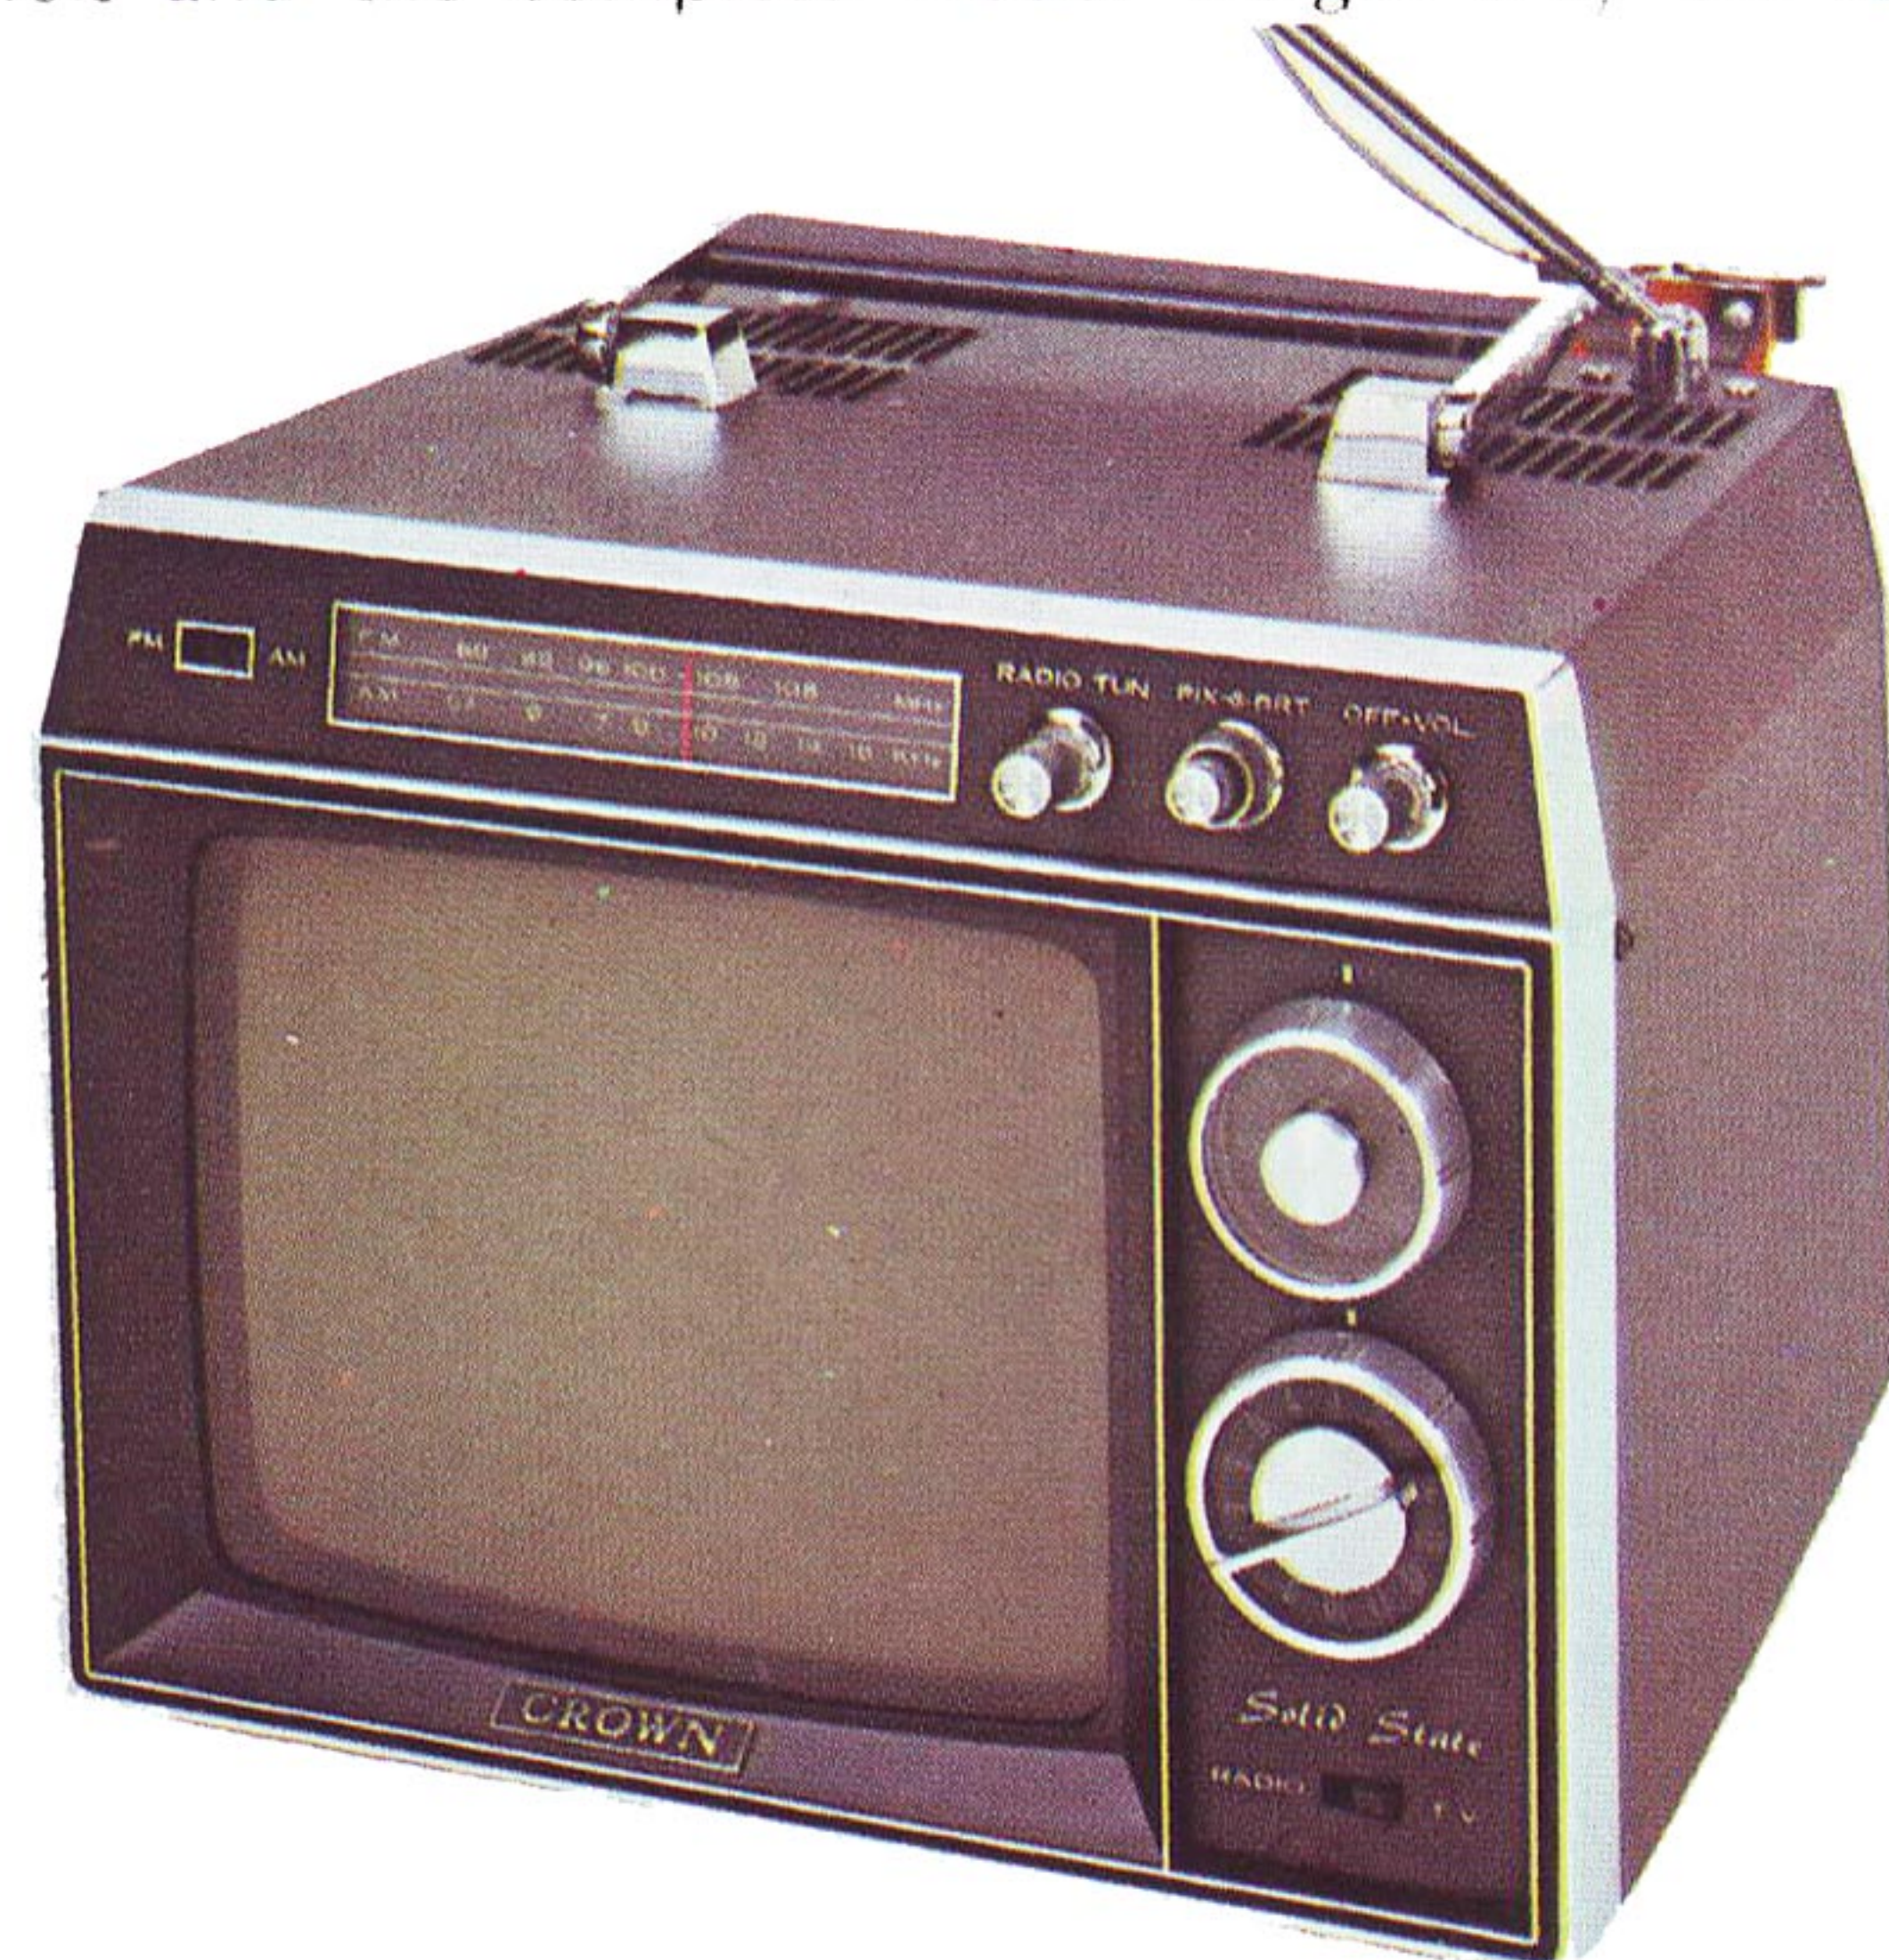

14TV-401. This big-screen portable TV combines a very attractive design with advanced solid-state circuitry. A special feature is its self-timing device which can be set to automatically switch off the set at any time within one hour. The 13" screen (diagonal) is larger than most portables yet the unit weighs only 25.5 lbs. It can sit handsomely in the home working off AC for both UHF and VHF. AFC and AGC are included within its quality circuitry.

9TV-301. Here's a personal TV/Radio combination that will give you its very best indoors or outdoors. With a 9" (diagonal) tinted glare-free screen you can see your favorite programs even under the midday sun. The radio delivers AM and FM and the TV pulls in all VHF and UHF channels. For home use it works off AC and for travelling there's an optional clip-on battery. Employs both Automatic Gain Control and Automatic Frequency Control for stability. Carrying handle retracts into cabinet. The 9TV-301 weighs 12.1 lbs.

CTV-12S. An ingenious little combination that puts together a finely made micro-TV with an AM/FM radio. The TV uses advanced solid state components to bring sharp, clear pictures to its 4" (diagonal) screen. It pulls in VHF and UHF channels and incorporates Automatic Frequency Control and Automatic Gain Control to remain stable in cars, boats etc. The screen is tinted to give sharp daylight viewing. Power can come from regular flashlight batteries, AC, nickel-cadmium battery pack. The set has attractive matt-black front panels and the complete model weighs only 6.4 lbs.

7TV-1SA. An entertaining two-in-one set, fully transistorized, light and portable. This unit features a 7" (diagonal) TV plus a sensitive 2-band radio (AM/FM). They've both been cleverly compacted into one without any extra bulk. The TV gets all VHF/UHF channels and you can take it anywhere because it has a selection of power source choices: AC, clip-on rechargeable battery pack or car/boat battery. Amazingly vivid pictures on glare-free screen. Instant TV-radio switchover. Complete with carrying handle and earphone. Weighs a featherweight 9.9 lbs.

PORTABLE RADIO

TRF-800AW. A deluxe radio that offers 4-band reception, full portability and powerful delivery. It has its own carrying handle and a handsome leatherette sheath.

14 transistors make it highly sensitive to FM/AM/LW/AIR. The special AIR band brings in all the specialized weather and navigational reports. For rich, clear delivery there's a tested oval speaker with larger dimensions than usual sets. On batteries or AC the TRF-800AW gives equally impressive results. Carries easily at 5.1 lbs and measures a compact 9-1/16" x 6-7/8" x 3".

FM-700/MS-701. An unusual two-piece portable that produces brilliant stereo FM and AM. The FM-700 is a 2-band portable radio that has the MS-701 matching FM stereo multiplex adaptor. The MS-701 clips neatly onto the back of the radio. Each unit has its own oval PM dynamic speaker and each has advanced solid state circuitry.

For FM stereo listening at home using AC you simply clip on the MS-701 and plug in the adaptor jack. For travelling you can use the FM-700 with regular flashlight batteries. Power output is a healthy 1000mW and the two unit together weigh only 4.1 lbs.
